TradeLab

A small graphic element next to the 'TradeLab' text, consisting of a vertical line of small dots and a red circular icon with a white 'B' inside.

Making Ideas Happen

Publishing an idea from the chart

Enable/Disable trading ideas on the charts. Ideas are displayed as dots:

- Yellow dot – Forecast
- Red dot – Signal to sell
- Green dot – Signal to buy

PUBLISH IDEA

By clicking this button you can share your idea with community users.

The following ideas types are available for publishing:

1. Forecast
2. Signal to Buy
3. Signal to Sell

Forecast – To publish a forecast you simply specify an idea title and description.

A forecast doesn't have Profit/Loss calculation and should be completed by the author manually at any given point of time. When completing a forecast, an author selects manually whether it was successful or not.

Publish Idea for CHFJPY, D1

My idea title

Buy Forecast Sell

Price (Ask) 112.91° Take profit 5.0 pips 112.96° Stop loss 5.0 pips 112.86°

Description

Publish

Signal to Buy/Sell – To publish a signal you must specify Stop Loss and Take Profit along with the title and a description. SL or TP can be setup up in pips or absolute values. It is not possible to change these values after the idea is published.

A signal has the following parameters:

- **Profit** – In pips
- **Rate of Return (RoR)** = Profit (pips) / Stop Loss (pips)

Broadcasts

Broadcasts can be created when publishing an idea. Either by a user, or a company for limited groups of contributors and/or subscribers.

What are they used for?

As a company you want to show your users only ideas published by certain experts invited to your broadcast (**open broadcast**) A closed broadcast can be used to sell your ideas to subscribers.

How to publish an idea in the broadcast

Publish Idea for CHFJPY, D1

my closed broadcast

Publish

Click in the broadcast list when publishing an idea, a dropdown list of available broadcasts will appear consisting of broadcasts created by yourself and broadcasts where you have been invited to publish ideas. You can select one or more broadcasts where you want to publish this idea. When you publish in a **"Public"** broadcast, all users will see your idea.

How to create a broadcast

In the dropdown list of broadcasts, select “**Create broadcast**”.

A screenshot of a web form titled "New Broadcast". At the top, there are two small square buttons, one with a checkmark and one with an 'X'. Below them is a text input field containing "New Broadcast". Underneath is a larger text area labeled "Description". Below the description area is a dropdown menu currently showing "Open (visible to all, open subs...)". Below the dropdown is a checkbox labeled "Broadcast enabled". At the bottom, there are three links: "Published ideas", "Contributors", and "Subscribers".

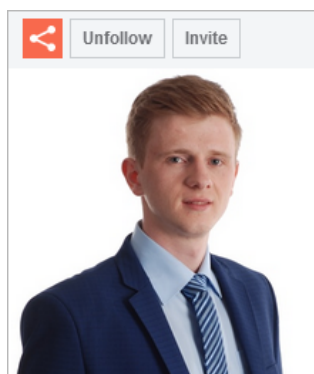

A new window will appear for you to add your broadcast details. You can specify the broadcast **name** and **description**.

Select the broadcast type:

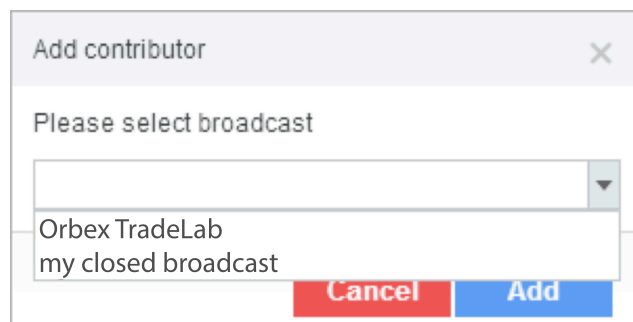

Open broadcast – Anyone can subscribe and all active and completed ideas are visible. This type of broadcast can be used when you limit the access of your users to ideas of certain experts – contributors of the broadcast.

Closed broadcast – The access for each subscriber should be granted manually by the broadcast owner. Only approved members (subscribers) can see all active and completed ideas. When creating a closed broadcast you can select which ideas (active or completed or none of them) will be visible to non-subscribers as a promotion of your broadcast.

Being the owner of the broadcast allows you to **invite** other authors to contribute ideas to your broadcast. Just click the “Invite” button in the **user profile** (as shown in the picture below).

Then select the broadcast for which you'd like to send the invite.

A screenshot of a dialog box titled "Add contributor" with a close button (X) in the top right corner. Inside the dialog, it says "Please select broadcast" above a dropdown menu. The dropdown menu is open, showing two options: "Orbex TradeLab" and "my closed broadcast". At the bottom right of the dialog are two buttons: a red "Cancel" button and a blue "Add" button.
